BULL STOCK TRADERS KEEP UP AN ACTIVE CAMPAIGN.

BULK OF DAY'S DEALINGS CONFINED TO FEW LINES.

Gold Exports for the Week Aggregate \$2,750,000 and London Still Sells Freely.

gain demonstrated its absorptive power today and made a various but quite convincing show of strength, notwithstanding the
appearance of a reactionary tendency in
some of the stocks, which tempted to realining by the high prices attained and a few
cases of positive weakness. The volume of
dealings was again below a milison shares,
and the bulk of the dealings was congested
in a few very active stocks. It was obvious, nevertheless, that the buil campaign
was still in force and that large and powerful capitalists were still committed to the
long side of the market. Not much attention was paid to the news of the day,
which was somewhat meagre in its ocaring
upon values of securities. The speculation
sufficed from one to another quarter of the
market in the usual progress of sotation egain demonstrated its absorptive power toous, nevertheless, that the buil campaign was still in force and that large and powerful capitalists were still committed to the long side of the market. Not much attention was paid to the news of the day, which was somewhat meagre in its ocaring upon values of securities. The speculation suffed from one to another quarter of the market in the usual progress of cotation by which skulful speculative leaders keep the movement of prices equalized from time to time and without regard to less developments. The weekly crop bulletin of the Weather Bureau was interpreted favorably on the whole. Some harm was reported to the various grain crops by too much rain, but relief from drought was reported for the cotton crop and the condition of the corn crop was considered highly eathsfactory.

Corn Prospect Helps Advance. The outcome of the corn crop is the domi-nant reature in the speculative situation and turned the scale of sentiment in favor of the advance. Some disappointment was felt over denials of yesterday's rumors that anthracite mining would be resumed on August I and the coalers and Eastern rail-roads generally, with the exerction of an anthracite mining would be resumed on August I and the coalers and Eastern raliroads generally, with the exception of an early advance in New York Central, were almost stationary. A feature of the day was the marking up of various dormant stocks which have not shared in the recent advance. This tendency extended to Nortnern Securities Company on the cure, which rose buoyantly to lie. Great Northern preferred advanced 4½, but lost hair of it. Those movements were simultaneous with the publication of an abstract of the indenture securing the new Oregon Short Line collateral bonds. This showed that provision is made for allowing that the Northern Securities stock deposited as collateral for these bonds shall be allowed to share in any reorganization project or further union or merger or sale and distribution of the company's assets. The profit taking in Pennsylvania was somewhat aggravates by the action of the New York Aldermen in rejecting the Pennsylvania tunnel contract. Brooklyn Transit was decidedly weak owing to the belief that the company's hid for construction of the East River tunnel will fail of acceptance. The granting of a stay of the Amalgamated Company's injunction against the workings of a disputed mine by a rival was held to explain the reactionary tendency in that stock.

There was a supplement in Specialities.

Upward Movement in Specialties. Upward Movement in Specialities.

There were striking upward movements in various specialities which were due to purely individual causes or manipulation. The expectation that yesterday's engagement of gold for export would be canceled was only partly realized, and there "as a further engagement by snother firm of \$1,050,000, thus bringing the exports for the week up to \$2,750,000. The sustained steadiness of the exchange market indicated that the shipment is in direct settlement of foreign obligations. London continued to sell stocks in this market. The call money market was somewhat firmer and the time money market distinctly so, but this did not seem to disturb the equanimity of the buyers of stocks. Active profit taking made the closing irregular and the net changes mixed.

The bond market was irregular. Total
